## eagle

A functional sofa of exquisite design - broad, expansive armrests and an overall appearance of lightness give an impression of a large bird with wings spread out - hence the name "eagle". A great deal of importance has been attached to the imposing outline of this solitary sofa - an outline which makes this furniture almost appear to float - all the while offering excellent seating comfort. The level of craftsmanship also stands out in this range - chromed metallic frames bear the weight of the cushioned body, which can be crafted to order in exquisite leather or fabric covers.

---

<b>Functions</b>	Elongated and dynamic in its flattened position, with backrest and armrests at the same level, Comfortable with ergonomically correct back support when backrests in the raised position, Caters to each individual user with the ability to adjust the left and right backrests to different positions
