x-chair

A functional armchair with a distinctive design and intelligent adjustment technology. A special cushioned support for the lumbar vertebrae area and an ergonomic back form provide ideal seating comfort. The backrest is raised slightly and reclined backwards, thus adapted the seating depth and height for a seating, relaxing or reclined position.

Functions	Continuously adjustable, from armchair to couch position by means of clamping device, Height-adjustable neck cushion
Options	With armrests Without armrests
Upholstery	Leather Fabric
Frame	Steel tubing, matt chrome, Side panels on seat made of flat steel, matt chrome, Visible tubing on backrest matt chrome, Armrests: Aluminium moulded element with leather overlay
Dimensions in cm	Width 69 (63 cm not including armrests), Depth 104-130, Height 106, Seat height 42, Seat depth 55-108

Awarded the „reddot design award for high quality of design“ by the Design Zentrum Nordrhein Westfalen in 1999

Awarded the „iF Design Award“ by the IndustrieForum Design, Hanover
